CRYO ANABOLICS

A Chilling New Era
Of Muscle Growth

At 320° below zero, mercury freezes, molecules behave differently, and the most hardcore and technologically advanced anabolic supplement in history is born ... ANABOLIC HALO!

Ten thousand years ago, glaciers up to three miles thick covered much of the world, and a sheet of ice lay where warm Pacific waters currently lap against the shores of Venice Beach, Calif. This devastating cold wiped out entire species, reshaped continents and permanently changed the course of evolution and human history. Researchers at Team MuscleTech™ found a way to magnify, focus and harness this force of nature in a way that will again change the face of history – this time creating an anabolic supplement unlike anything ever seen, or even conceived, before! Team MuscleTech researchers and scientists, who continuously look for new and novel technologies to enhance the power of their supplements, methodically analyzed the effects of impossibly low temperatures on molecules, matter and anabolic elements. What they discovered changed the way anabolic compounds were engineered and set a new standard in supplement innovation. ANABOLIC HALO™ would revolutionize the way bodybuilders build muscle – forever!

MASSIVE MUSCLE GAINS WITH CRYO-ANABOLICS

At 320 degrees below zero, a temperature as cold as the surface on the planet Neptune, even some of the most resilient elements in the Earth's atmosphere are forced to change molecular states. So when Team MuscleTech researchers exposed potent musclebuilding particles to multiple subzero cryogenic technologies as cold as -320°F, what they

witnessed had them both shocked and extremely excited. These cryo-anabolic compounds never before experienced in a bodybuilding supplement are what Team MuscleTech researchers and scientists used to create the most hardcore anabolic/non-androgenic musclebuilding cycle ever – ANABOLIC HALO.

ANABOLIC HALO BUILDS FREAKY MUSCLE FAST

It's simple, you won't build any muscle unless you're anabolic, and ANABOLIC HALO catapults you into a powerful anabolic state that has to be experienced to be believed. This formula is so mega-dosed with key anabolic ingredients that other supplement companies wouldn't even consider it. The cryo-anabolic formula is loaded with more than 75 scientifically researched ingredients never before seen in such cutting-edge combinations. These powerful compounds synergistically tackle six critical musclebuilding elements that you need for massive and rapid growth. (Check out the scientific diagram on the next page!)

HOW ANABOLIC HALO BUILDS MONSTROUS MUSCLE

THE CRYOGENICALLY ENGINEERED ANABOLIC HALO™ formula quickly courses through your bloodstream, navigating more than 75 scientifically researched and musclebuilding

ingredients into your muscle cells. This sets off a powerful combination of six growth-inducing events guaranteed to make your muscles grow like you never thought possible!

THE 6 CRITICAL GROWTH-INDUCING ELEMENTS

1 GREATER FREE-TESTOSTERONE UTILIZATION

Team MuscleTech™ researchers found a way to drive anabolically active free testosterone, the only form of testosterone in the body that's able to build muscle, directly into muscle cells. The only way to do this is by increasing androgen receptor quantity. Androgen receptors bind to free testosterone and allow them to signal muscle growth. In fact, in a 21-day clinical study conducted at a human

performance laboratory, just one of the powerful musclebuilding compounds in ANABOLIC HALO was shown to dramatically increase the number of pre-workout androgen receptors compared to a placebo. No other supplement has ever identified this scientific breakthrough before. By enhancing free-testosterone utilization, ANABOLIC HALO sets into motion an unforgiving stage of pure, unadulterated growth.

2 ANABOLIC TRANSCRIPTION FACTOR (ATF-4) MODULATION

ANABOLIC HALO modulates the Anabolic Transcription Factor ATF-4 by upregulating one of the body's most powerful musclebuilding hormones, insulin. ATF-4 plays a uniquely critical role in the regulation of muscle anabolism, to trigger muscle growth in ways you've never imagined.

1 GREATER FREE-TESTOSTERONE UTILIZATION

5 SATELLITE CELL ACTIVATION

4 INHIBITION OF CATABOLIC MACHINERY

2 ANABOLIC TRANSCRIPTION FACTOR (ATF-4) MODULATION

6 INCREASED MUSCLE FIBER AREA

3 INSULIN MANIPULATION

3 INSULIN MANIPULATION

The ANABOLIC HALO multi-platform cycle directly manipulates insulin from deep within your pancreas. This supersensitizes your muscle cells for maximum nutrient absorption to optimize a rich anabolic environment primed for dramatic size gains.

4 INHIBITION OF CATABOLIC MACHINERY

The fourth element works to freeze the activity of the key biochemical mediators of muscle catabolism. ANABOLIC HALO is actually able to shut off the switches that limit muscle size, to shield your muscles from the muscle wasting effects of catabolism.

5 SATELLITE CELL ACTIVATION

ANABOLIC HALO actually alters your physiological profile for drastic muscle recomposition. Leading muscle cell research has proven that a key active ingredient in ANABOLIC HALO works within your muscle cell to dramatically amplify satellite cell number per muscle fiber by over 100 percent in just 28 days!

6 INCREASED MUSCLE FIBER AREA

In a 16-week clinical study, researchers at a leading university discovered that a supreme key compound in ANABOLIC HALO actually forces an increase in muscle fiber area by an astonishing average of 16.8 percent. Yes, you read that correctly – 16.8 percent! You can't control the effects that will follow – freaky muscle growth, eerie definition and ice-cold hardness!

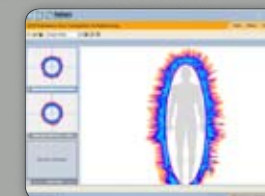

The first element Team MuscleTech™ researchers and scientists conquered was greater free-testosterone utilization. Examining countless clinical studies and research abstracts, Team MuscleTech researchers actually found a way to drive anabolically active free testosterone directly into your muscle cells. Please reread that statement correctly – this is a shocking advancement!

Team MuscleTech researchers actually found a way to drive anabolically active testosterone directly into your muscle at the cellular level!

You see, free testosterone is the only form of testosterone in the body that can be used to build muscle. The other form of testosterone, bound testosterone, is virtually useless when it comes to muscle growth. However, only about 2 percent of testosterone in normal men is free testosterone. So finding a way to enhance the

CAN SCIENTISTS SEE "THE FEELING" YOU GET FROM ANABOLIC HALO?

ANABOLIC HALO is so strong you can actually *feel* it as it switches your musclebuilding machinery into high speed – but is this sensory phenomenon something that you can see? Some researchers say, "Yes!" Using an experimental technology that measures electron photographic emissions, scientists conducted a study that recorded and quantified the bioelectric energy of more than 100 Olympic athletes. The researchers were able to correlate specific "luminescent signatures" (also called halos) with optimal athletic potential. To put those findings to the test, Team MuscleTech researchers ran IFBB Pro Fouad Abiad through the same type of electromagnetic diagnostics at an independent facility. According to the lab's analysts, images of Fouad taken before, and 45 minutes after consuming ANABOLIC HALO, indicated a dramatic increase in activity in areas associated with the musculoskeletal system. Their analysis of Fouad's luminescent signature told them, yes, you can actually see the anabolic halo!

While these imaging technologies are presently too experimental for Team MuscleTech researchers to describe them as hard science or "proof" of what happens when you use ANABOLIC HALO, the fact remains that you will *feel* the power of this revolutionary musclebuilding breakthrough! And we're sure that you'll see the results in the mirror where it really counts!

utilization of free testosterone is extremely critical to building massive amounts of muscle. Scientists and researchers (and bodybuilders) struggled with this problem for years. Until now!

A key compound in ANABOLIC HALO is scientifically proven to increase muscle fiber area by an average of 16.8%!

Team MuscleTech researchers engineered ANABOLIC HALO with a powerful agent that's been scientifically proven to dramatically amplify free-testosterone utilization. The only way to do this is by increasing the number of muscle androgen receptors. Androgen receptors bind to free testosterone and allow them to signal muscle growth. In fact, just 21 days into a human clinical study, a powerful musclebuilding compound in

Seconds into your first dose of ANABOLIC HALO you'll feel an intense glacial-like chill hit the back of your throat. The subzero outbreak has begun!

ANABOLIC HALO™ dramatically increased the number of pre-workout androgen receptors compared to a placebo. What this means is that your muscles are armed with more musclebuilding free testosterone. What's more, it does this all without any negative effects on your body's own testosterone production.

A critical anabolic agent in ANABOLIC HALO can amplify muscle satellite cell concentration by over 100% in just 28 days!

Both scientists and bodybuilders are shocked by this discovery. No other supplement in the world has ever identified this scientific breakthrough before. By flooding your body with anabolically active testosterone at the cellular level, your muscles will be forced to respond in ways they never have. You'll be primed to experience pure, unadulterated anabolic effects!

Any other supplement company would have stopped here. But to design the most hardcore anabolic/non-androgenic musclebuilding cycle on the planet, Team MuscleTech™ researchers and scientists went further. ANABOLIC HALO modulates the Anabolic Transcription Factor ATF-4, a key regulator of muscle anabolism, by upregulating one of the body's most powerful musclebuilding hormones, insulin. Anabolism is the physiological state when your body is building muscle. It's the only state a bodybuilder ever wants to be in. Then, ANABOLIC HALO directly manipulates insulin and fights the muscle wasting state of catabolism, so that you're more anabolic than ever and your muscles are free to grow to monstrous proportions!

Even as your muscles expand and grow thanks to the powerful ANABOLIC HALO formula, it doesn't let up. The clinically engineered formula is proven to amplify the number of satellite cells per muscle fiber by over 100 percent – in just 28 days! These satellite cells respond to

More than 75 ingredients, and 3 cryogenic technologies = the most scientifically advanced anabolic supplement on the planet – ANABOLIC HALO!

growth signals to increase the size of muscle tissue. Researchers even discovered that the same key anabolic complex could actually increase muscle fiber area by a staggering average of 16.8 percent in just 16 weeks! These dramatic physiological changes available through ANABOLIC HALO produce musclebuilding results at chilling and frightening speeds. Your muscles have no choice but to grow – and FAST!

CHILLING MUSCLE GAINS WITH CRYGENICALLY ALTERED ANABOLICS

Within seconds you'll feel an intense glacial-like chill hit the back of your throat – like an avalanche of polar ice. The subzero outbreak has begun! It feels like your entire physiological profile is "freezing" as the mega-dose of more than 75 cutting-edge ingredients in the ANABOLIC HALO formula courses through your veins. The power of ANABOLIC HALO has begun!

Three pharmaceutically inspired, cryogenic technologies never before witnessed within the realm of bodybuilding supplementation synchronize the muscle manipulating powers of ANABOLIC HALO.

HOW SUB-ZERO™ CRYOGENIC ANABOLIC TECHNOLOGY WORKS

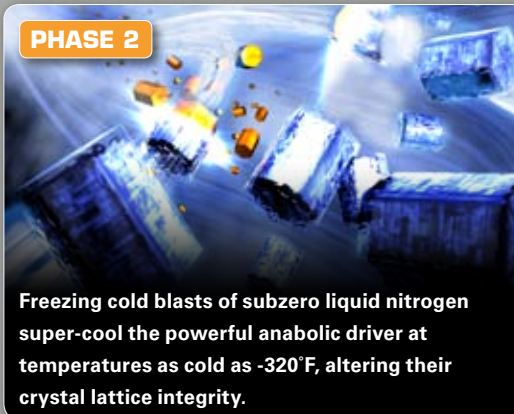

PHASE 1

Key Anabolic Driver **-320°F Liquid Nitrogen**

A key anabolic driver in ANABOLIC HALO is fed into a cryogenic chamber in scientifically measured amounts along with freezing liquid nitrogen. Inside the cryogenic chamber, the anabolic driver is exposed to impossibly low temperatures and an environment as cold as the planet Neptune's frigid surface.

PHASE 2

Freezing cold blasts of subzero liquid nitrogen super-cool the powerful anabolic driver at temperatures as cold as -320°F, altering their crystal lattice integrity.

PHASE 3

Physically Altered Key Anabolic Driver

The thermomechanically altered driver is then forced into an advanced modification process involving a series of complex interactions, including subzero particle-to-particle contact. This pharmaceutically inspired process creates a thermomolecularly enhanced cryo-anabolic compound that has never before been seen within the realm of bodybuilding supplementation. A filtration mechanism prioritizes the release of the particles to ensure that the complex has been cryogenically altered.

THE EXPLOSIVE POWER OF -320°F

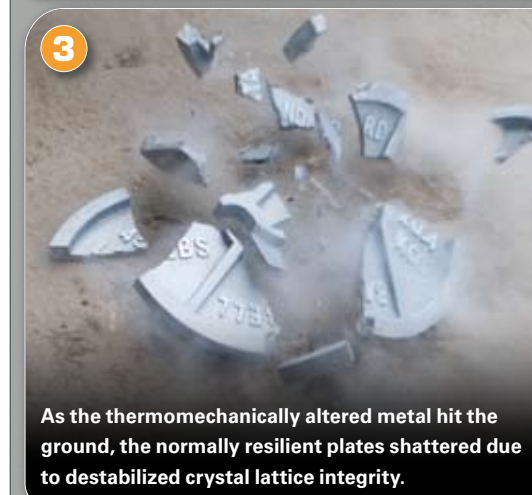

To demonstrate just how powerful the cryogenic technology behind ANABOLIC HALO™ is, Team MuscleTech™ exposed real 45-pound iron plates to the same -320°F liquid nitrogen used in SUB-ZERO™ Cryogenic Anabolic Technology. These are the very same plates you lift in the gym. No other supplement in history has harnessed this powerful technology.

1 Solid 45-pound iron plates were submerged in gallons of -320°F liquid nitrogen, freezing them to impossibly low, subzero temperatures.

2 When the iron emerged, water in the atmosphere immediately frosted over the plates and left a vapor trail as they dropped through the air.

3 As the thermomechanically altered metal hit the ground, the normally resilient plates shattered due to destabilized crystal lattice integrity.

4 Just as iron and other elements take on seemingly unreal properties when subjected to cryogenic processes, so too will your muscles grow beyond anything you (or anyone else) has ever experienced. That is the awesome power of ANABOLIC HALO!

The first, SUB-ZERO™ Cryogenic Anabolic Technology, utilizes liquid nitrogen as cold as -320 degrees Fahrenheit to thermomolecularly enhance a precise portion of a key musclebuilding molecule. That's right – Team MuscleTech researchers actually exposed one of the most potent anabolic molecules scientifically possible to the same subzero temperatures capable of making real 45-pound iron plates shatter to pieces. These are the very same plates that you bench, curl and lift in the gym every day. If this sounds far-fetched, just check out the untouched photos in the sidebar to the left and see the remarkable power of liquid nitrogen for yourself! The resulting, cryogenically modified anabolic formula is so unique, Team MuscleTech continues to test its potent effects.

Make no mistake. ANABOLIC HALO is P-O-W-E-R-F-U-L! It's the most hardcore anabolic/non-androgenic musclebuilding cycle you'll ever experience!

But to engineer the most hardcore anabolic supplement ever conceived, Team MuscleTech researchers investigated and scoured the planet to find the most potent anabolic ingredients and scientifically advanced thermomechanical technology they could get their hands on. This led them to Lyophilization. Based on years of pharmaceutical use, this advanced technique employs sublimation to freeze-dry a proprietary dose of a key ingredient in ANABOLIC HALO to actually change its physical properties. This micro-molecular process is so advanced, it actually forces molecules to skip matter states and go directly from a solid to a gas without ever becoming a liquid. The resulting muscle-altering compounds are unlike anything ever exposed to your muscles.

In true Team MuscleTech fashion, the researchers and scientists specially assigned to formulate ANABOLIC HALO still weren't finished pushing the boundaries of science. They unlocked the doors on a third, frighteningly cold cryogenic process called SUB-ZERO™ Anabolic Crystallographic Technology. This groundbreaking technology discharges a 180-minute treatment of subzero liquid nitrogen at -150 degrees Fahrenheit on yet another critical anabolic agent in ANABOLIC HALO. This advanced particle processing technology creates an anabolic element unlike anything seen within the bodybuilding community!

GET ON, GET ANABOLIC, GET HUGE!

ANABOLIC HALO is the most hardcore anabolic/non-androgenic musclebuilding cycle you'll ever experience! More than 75 cutting-edge and musclebuilding ingredients, including three cryogenically altered and muscle-morphing compounds, set off six critical events that force inhuman muscle growth the likes of which no bodybuilder has ever experienced. Get on, get anabolic, and get ridiculously huge – now!
