

A Look Inside The World's Most HARDCORE ANABOLIC FORMULA

Discover how ANABOLIC HALO molecularly activates 6 critical growth-inducing elements, to optimize a chillingly powerful anabolic environment that forces ice-cold muscle hardness and your freakiest muscle gains ever!

Within seconds, you'll feel the glacial-like frost freeze the back of your throat. Then you know it has begun – a total body muscle metamorphosis ... a transitional growth phase that has you take on the frame and physique of a larger, more muscular being. A never-before-seen arsenal of anabolic and muscle-morphing compounds floods your muscular pathway, switching on the currents that control your growth, and telling your muscles to take on massive,

The mega-dose of muscle-morphing compounds in ANABOLIC HALO switches on your anabolic machinery, forcing your muscles to explode with size!

granite-thick shape! It synergizes a shockingly powerful anabolic environment that radiates from your muscles, setting the stage for chilling, eerie muscle gains the likes of which no bodybuilder has ever imagined. This is the world's most hardcore anabolic/non-androgenic musclebuilding cycle. This is ANABOLIC HALO™. Brace yourself, as the ultra-potent blend sets off a sequence of six growth-inducing elements (see the diagram on the right) guaranteed to make your muscles balloon

to monstrous proportions ... like you've never seen before!

1 UNLEASH ANABOLICALLY ACTIVE FREE TESTOSTERONE

The multi-platform, growth-inducing cycle starts by driving anabolically active free testosterone – the only form of testosterone that can be used for muscle growth – directly into your muscle cells. In fact, in a 21-day human clinical study, a powerful muscle-building compound in ANABOLIC HALO dramatically increased the number of pre-workout androgen receptors compared to a placebo. Androgen receptors bind to free testosterone and allow them to signal muscle growth. This increase in free-testosterone utilization sets the stage for raw, unadulterated increases in muscle size and strength!

2 MANIPULATE THE MUSCLEBUILDING HORMONE INSULIN

ANABOLIC HALO directly manipulates insulin, one of the body's most powerful

1 GREATER FREE-TESTOSTERONE UTILIZATION

5 SATELLITE CELL ACTIVATION

4 INHIBITION OF CATABOLIC MACHINERY

6 INCREASED MUSCLE FIBER AREA

2 INSULIN MANIPULATION

3 ANABOLIC TRANSCRIPTION FACTOR (ATF-4) MODULATION

SIMULTANEOUSLY TRIGGER 6 GROWTH-INDUCING ELEMENTS

ANABOLIC HALO takes over your entire physiological profile with potent, anabolic dominance. The mega-dosed, cryo-anabolic formula tackles six critical growth-inducing elements required to program your muscles to grow in ways that will shock you!

musclebuilding hormones. By activating critical cellular transporters, insulin drives maximum anabolic nutrient uptake, optimizing a rich anabolic environment primed for shocking size and strength gains.

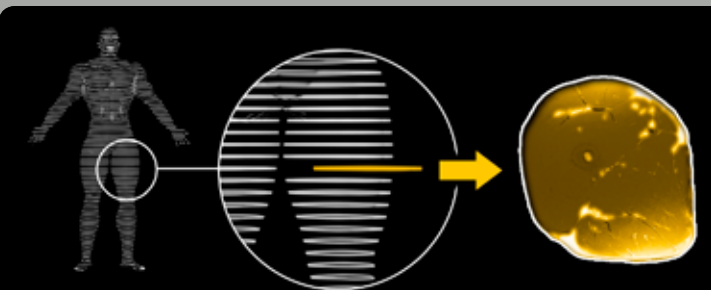

3 MODULATE ANABOLIC TRANSCRIPTION FACTOR (ATF-4)

Next, the mega-dosed formula upregulates insulin, to modulate the anabolic transcription factor ATF-4. Insulin-mediated induction of ATF-4 is critical to hormonal regulation of amino acid and protein anabolism, to literally program your muscles to grow!

4 OPTIMIZE YOUR ANABOLIC MACHINERY

ANABOLIC HALO™ controls your key biochemical mediators of muscle catabolism, working to freeze them and helping to shut off the switches that limit muscle size. This ruthlessly throws your muscles into an uncontrollable stage of pure growth.

CLINICAL MRI TECHNOLOGY PHOTOGRAPHS A BODYBUILDER ON ANABOLIC HALO

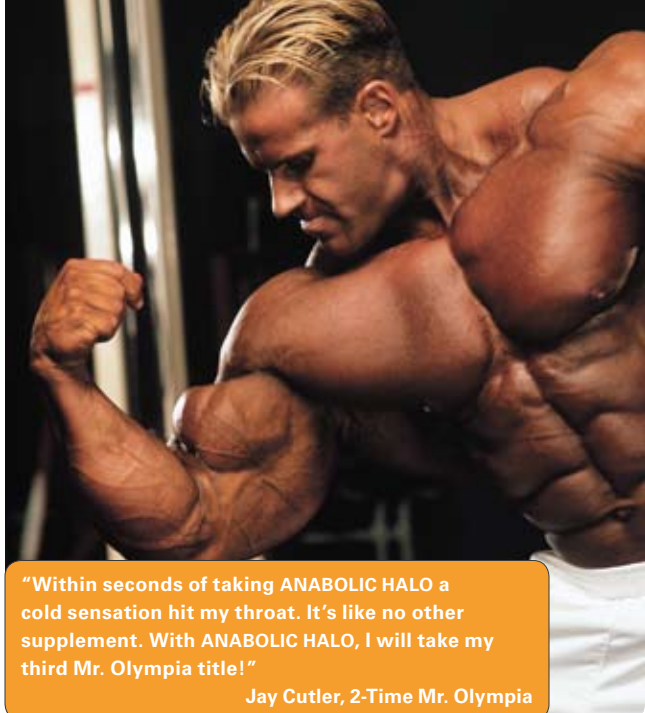

This is an actual untouched MRI photo of IFBB pro Fouad Abiad just minutes after a dose of ANABOLIC HALO.

Team MuscleTech researchers used Magnetic Resonance Imaging (MRI), a trusted muscle imaging technique that's been used by doctors for years, on Fouad Abiad after he had taken a dose of ANABOLIC HALO. Researchers at the University of Connecticut also used MRI testing to prove the musclebuilding potency of a key anabolic ingredient in ANABOLIC HALO. In the 3-week clinical study, subjects experienced a decrease in muscle tissue disruption, or catabolism, and an exponential increase in anabolic response.

5 AMPLIFY SATELLITE CELL CONCENTRATION BY OVER 100%

ANABOLIC HALO seeks out your muscles like prey and feeds their craving to expand. Your muscles harden and swell as it manipulates your physiological profile, setting the stage for drastic muscle hypertrophy! Just 28 days into a clinical study conducted at a leading university, a powerful ingredient in ANABOLIC HALO actually amplified the number of satellite cells within muscle fibers by over 100 percent! These satellite cells respond to growth signals to increase the size of muscle tissue and force frighteningly fast size gains!

"Within seconds of taking ANABOLIC HALO a cold sensation hit my throat. It's like no other supplement. With ANABOLIC HALO, I will take my third Mr. Olympia title!"

Jay Cutler, 2-Time Mr. Olympia

6 MAGNIFY TOTAL MUSCLE FIBER AREA BY 16.8%

There's even more unbelievable results. The same key anabolic complex increased muscle fiber area by a staggering average of 16.8 percent in just 16 weeks! You'll experience radical muscle recomposition, unadulterated increases in muscle size and overpowering surges in raw strength!

Team MuscleTech™ researchers actually found a way to drive anabolically active testosterone directly into your muscles for massive muscle growth!

To make sure that ANABOLIC HALO is the most hardcore musclebuilding supplement your muscles will ever experience, the team of researchers specially assigned to engineer the formula looked to the pharmaceutical industry for inspiration and applied three technologies never before seen in bodybuilding.

MASSIVE MUSCLE GROWTH WITH CRYO-ANABOLIC MOLECULES

Featuring SUB-ZERO™ Cryogenic Anabolic Technology, Lyophilization and SUB-ZERO™ Anabolic Crystallographic Technology, ANABOLIC HALO unleashes the exclusive power of cryo-anabolic molecules.

HOW SUB-ZERO™ CRYOGENIC ANABOLIC TECHNOLOGY WORKS

PHASE 1

Key Anabolic Driver -320°F Liquid Nitrogen

A key anabolic driver in ANABOLIC HALO is fed into a cryogenic chamber in scientifically measured amounts along with freezing liquid nitrogen. Inside the cryogenic chamber, the anabolic driver is exposed to impossibly low temperatures and an environment as cold as the planet Neptune's frigid surface.

PHASE 2

Freezing cold blasts of subzero liquid nitrogen super-cool the powerful anabolic driver at temperatures as cold as -320°F, altering their crystal lattice integrity.

PHASE 3

Physically Altered Key Anabolic Driver

The thermomechanically altered driver is then forced into an advanced modification process involving a series of complex interactions, including subzero particle-to-particle contact. This pharmaceutically inspired process creates a thermomolecularly enhanced cryo-anabolic compound that has never before been seen in a bodybuilding supplement. A filtration mechanism prioritizes the release of the particles to ensure that the complex has been cryogenically altered.

SUB-ZERO™ Cryogenic Anabolic Technology uses mechanically measured blasts of impossibly low-temperature liquid nitrogen, as cold as -320 degrees Fahrenheit, to thermomolecularly enhance a precise portion of one of the most anabolic compounds on the planet.

The second pharmaceutically inspired technology, called Lyophilization, actually changes the physical configuration of a proprietary dose of an anti-catabolic complex in ANABOLIC HALO™. This micro-molecular process called sublimation is so advanced, it actually forces molecules within a structure to skip matter states and go directly from a solid to a gas.

There are more than 75 cutting-edge ingredients in ANABOLIC HALO – the most hardcore anabolic formula on the planet!

The third, cryogenic process, called SUB-ZERO™ Anabolic Crystallographic Technology, discharges a 180-minute treatment of liquid nitrogen at -150 degrees Fahrenheit on a critical anabolic driver. The resulting molecular structure is unlike anything ever witnessed in bodybuilding!

YOUR FREAKIEST GAINS EVER BEGIN RIGHT NOW!

With your first dose, the hyper-potent ANABOLIC HALO formula is quickly driven into your muscle receptor sites to force a supremely powerful anabolic state! You may not be ready for the continuous musclebuilding overload ... for the unrelenting growth phase that leaves you with so much thick, dense muscle your vascularity presses through your skin, demanding to be seen. You may be shocked to watch your muscles expand like never before ... but it's too late. You belong to ANABOLIC HALO. Embrace your new massive form, and all the attention that will follow!
