

WHAT IS AFFILIATE MARKETING, AND HOW DOES IT WORK?

Affiliate Marketing is a performance-based advertising program in which online publishers, or affiliates, can earn a commission on orders submitted by customers they refer to an online merchant (Bodybuilding.com). They do this by creatively integrating Bodybuilding.com's products or content into their site through blogs, product reviews, banner advertisements, etc. The tracking process is simple. Once in the Bodybuilding.com affiliate program, affiliates can create affiliate links to Bodybuilding.com. When that link is clicked on by a visitor to that affiliate's site, a tracking cookie is planted on that user's computer. When that same visitor completes a purchase at Bodybuilding.com, the cookie fires and a commission is applied to that affiliate's account. The cookie exists on that user's computer for 9 days, so the purchase does not have to be completed in the same visit.
